Participants from CH in Horizon Europe

With effect of 17 June 2021, participants from CH (PCH) in Horizon Europe are considered to be coming from a (high-income) Third Country (TC). This has the following retroactive effects on any 2021 call:

**Multi-beneficiary projects – RIA, IA; MSCA DN, MSCA SE; EIC**
- PCH can participate in any proposal, unless a topic specifically excludes TC participation. However, they do not count towards the minimum number of partners in a consortium.
- PCH will be included in the project as an “Associated Partner” (AP). Such APs do not count towards the minimum or maximum number of participants in any type of action.
- If the proposal is successful, the PCH contribution will be funded by the Swiss State Secretariat for Education, Research and Innovation (SERI; “Financial Guarantee”)
- As an Associated Partner, PCH cannot coordinate a project. However, they can act as Work Package Leaders.

**Multi-beneficiary projects – CSA**
- TC legal entities are eligible to participate only in exceptional cases and if provided for in the specific topic text.

**Multi-beneficiary projects – ERC SyG**
- PCH are eligible to participate with TC status as long as all other Principal Investigators (incl. the Corresponding one) are either in a Member State or in an Associated Country.
- If the proposal is successful, the PCH will be funded by the EC.

**Mono-beneficiary projects - general**
- PCH are not eligible to apply for grants to only 1 participant (e.g. most ERC Grants, MSCA Postdoctoral Fellowships, MSCA Cofund, EIC, EIC Acc).

**Mono-beneficiary projects – MSCA Global Fellowships**
- CH is eligible as a host country for the outgoing phase of a MSCA Global Fellowship.
- Swiss nationals are not eligible for participation in MSCA Global Fellowships, unless they are long-term residents in a Member State or Associated Country.

Already submitted proposals for mono-beneficiary grants are not evaluated, except for ERC StG and CoG. For more details, see the SERI Information on the Swiss Participation (p.2).

SERI is evaluating suitable measures to fund project types currently excluded from application by PCH.
