European Programmes

Do you know your programme?

Euresearch is mandated to offer services on the European Union research and innovation programmes. The programmes presented in these sub-pages are key initiatives coming from the Europe 2020 Initiative.

Horizon 2020 – the successor to the 7th Framework Programme for Research and Competitiveness and Innovation Framework Programme (CIP) – is the prominent funding programme. It runs from 2014 to 2020 with a €70.2 billion budget and is part of the drive to create new growth and jobs in Europe.

The other programmes are part of the Innovation Union, which is one of the 7 Flagship Initiatives of the Europe 2020 Strategy for smart, sustainable and inclusive growth.

The Innovation Union has main 3 goals:

- make Europe a world-class science Performer
- remove obstacles to innovation – like expensive patenting, market fragmentation, slow standard setting and skills shortages – that currently prevent ideas getting to market quickly
- revolutionise the way public and private sectors work together, notably through Innovation Partnerships between European institutions, national and regional authorities and Business.

Your Euresearch Regional Office

is happy to help you with any questions or problems you may have.
