

Open, Innovative and Collaborative Government

The e-Government enables citizens, enterprises and organisations to carry out their business with government more easily, more quickly and at lower cost. This Net4Society factsheet aims at informing research and innovation actors about the established framework to achieve an effective e-Government policy.

The e-government policy is coordinated by DG CONNECT

DIGITAL SINGLE MARKET (DSM)

The Digital Single Market is a strategy of the European Commission to ensure access to online activities for individuals and businesses under conditions of fair competition, consumer and data protection, removing geo-blocking and copyright issues. The European Commission has identified the completion of the Digital Single Market (DSM) as one of its 10 political priorities.

The Digital Single Market Strategy for Europe identified e-Government as one of the key elements to maximise the growth potential of the digital economy and to achieve an inclusive digital Europe. In April 2016 was published the e-Government Action Plan ('Action Plan') for the period of 2016-2020, setting out the vision, underlying principles and policy priorities.

The European e-Government Action Plan 2016-2020 Pillars

- I. Modernising public administration with ICT, using key digital enablers
- II. Enabling cross-border mobility with digital public services
- III. Facilitating digital interaction between administrations and citizens/businesses

This is a Net4Society FACTSHEET. Net4Society FACTSHEETS aim at informing researchers and others interested in Horizon 2020 funding about application and political context. You can download it in the following link: <http://www.net4society.eu/>
"Net4Society is the network of national contact points established to aid applicants into Horizon 2020 Social Challenge 6"

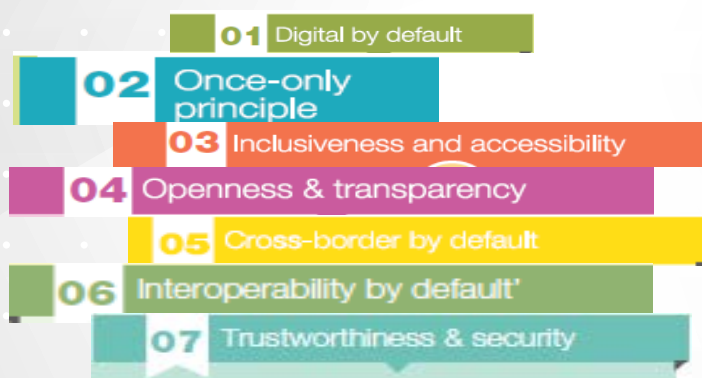

Topics in WP2018-2020 which refers a digital e-government transformation

DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions

DT-TRANSFORMATIONS-02-2018-2019-2020: Transformative impact of disruptive technologies (such as block-chain, Internet Of Things, etc...) in the public services

DT-GOVERNANCE-05-2018-2019-2020: New forms of delivering public goods and inclusive public services

DT-GOVERNANCE-12-2019-2020: Pilot on using the European cloud infrastructure for public administrations

The e-government actions:

Speeding up the implementation of the eIDAS regulation, including the notification of electronic identity schemes and making digital public services secure and identifiable by using the eIDAS framework for qualified electronic trust services

Introducing once-only options in digital public services by collaboration and data exchange, including with other countries

Re-use of the Digital Service Infrastructures developed under the Connecting Europe Facility increase the availability and quality of open government data and enable automatic access to databases make more use of open source solutions and open standards

more and faster experimentation with emerging ICT within the public administration
