The BRNO UNIVERSITY OF TECHNOLOGY, public entity, non-profit organisation, established in 1899, is a leading university in tertiary education and research achieving also excellent business results thanks to its painstaking attention to cooperation with the industrial sphere. At the present time BUT has 23,000 students, 8 faculties and 3 university institutes. In recent years, BUT has received over 8 billion CZK from the EU structural funds. It is thus among the successful Czech universities receiving ESF and ERDF funding.

Faculty of Civil Engineering is the oldest (founded in 1899) and the largest faculty of BUT with the highest number of students. It is possible to study in accredited Bachelor’s, Master’s and Doctoral degree programmes. Faculty of Civil Engineering offers as well as Lifelong Learning courses and contributes significantly to the scientific-research activities.

AdMaS (Advanced Materials, Structures and Technologies) is a modern science centre and comprehensive civil engineering research institution. It is part of the Faculty of Civil Engineering. We focus on research and development in the area of advanced construction materials, structures and technologies, and their real-world application in not only the construction industry, but also transportation systems and the infrastructures of cities and municipalities. The AdMaS Centre is currently involved in 99 science and research projects in total. On 1 January 2015, started the project “AdMaS UP – Advanced Materials, Structures and Technologies” (No. LO1408). It is supported by the Ministry of Education, Youth and Sports under the “National Sustainability Program I” and its aim is to support sustainability of the AdMaS Centre.

Our team would like to take part and submit a proposal in Horizon 2020, Call SwafS-03-2016-2017, topic: Support to research organisations to implement gender equality plans.

We are looking for strong partner / coordinator with experience in gender issues in order to establish new consortium.

If you are interested, please, do not hesitate to contact us!
